Dear Parent and Playworker

Gwiazdy Poland

What you need:

What to do:

Turn your A4 rectangle paper into a square by folding one corner flush to the other side. Cut off the bottom section which is not required. Open this out; you should now have a square.

Fold your square in half so this makes a rectangle, then fold again to make a square. Now fold in half corner to corner to make a triangle. With a pencil draw a small curved line at the top of the open side of the triangle and cut this off. You should now have a cone shape.

Draw a symmetrical design (same on both sides). Don't draw any cuts all the way through or you'll end up with confetti instead of a star. Cut along your design.

Open out and you now have a star.

Try using coloured paper, wrapping paper or painting the paper before you start to get different textures and colours.
